

****🎉 WELCOME TO JITSU 🎉****

QA Team – Your First Day Starter Kit

| ****A note from your QA Lead – Hue Chu**** Welcome to the Jitsu QA team! We're glad to have you. The first two weeks will feel like drinking from a firehose – that's completely normal. Don't worry about memorizing everything. Focus on understanding the big picture, ask lots of questions, and trust the process. By the end of week 2, you'll be running real tickets confidently. We've prepared a detailed roadmap (the Onboarding Plan) to guide you day by day. This Welcome Kit is your quick reference for Day 1. Let's make it a great start! 🚀 |

| --- |

📅 Your First Day at a Glance**

Time	**What you'll do**
--- ---	
9:00 AM	Welcome meeting with QA Lead (Hue Chu) and your assigned Buddy (30 min)
9:30 AM	Verify account access – Jira, Confluence, QMetry, Slack, etc.
10:00 AM	Security tools setup – Drata + 1Password (login with Jitsu Google account)
11:00 AM	Read Training Document v4 – Sections 1 & 2 (business + terminology)
13:00 PM	System tour – explore Dashboard, Dispatch, Client Web, Recipient Web, DSP Portal
15:00 PM	StrongDM setup – install, connect PostgreSQL + MongoDB Staging
16:30 PM	Daily Slack Report – post your Day 1 update in the QA channel

👥 Your People**

Three key people in your first two weeks:

Role	**Name**	**When to reach out**
--- --- ---		
QA Lead	**Hue Chu**	Big decisions, blockers > 1 hour, process questions, escalation
Your Buddy	**[Buddy Name]**	Day-to-day questions, technical help, daily 15-30 min for chat
You	**[Your Name]**	Your job: ask questions, learn, post daily Slack reports

| ****💡 The 15-minute rule**** If you're stuck for more than 15 minutes, ASK your buddy. Don't waste time spinning your wheels – that's exactly what we're here for. |

| --- |

💬 Essential Slack Channels**

Join these on Day 1. Pin them at the top of your sidebar.

Channel	**What it's for**
--- ---	
#qa-web	Main QA team channel – daily reports, web app discussions, sprint updates
#qa-mobile	Mobile testing – Driver App, Outbound App, Warehouse App, build releases
#general	Company-wide announcements, all-hands, team news
#it	For IT/access issues – Drata, 1Password, account problems
#devops	StrongDM issues, infrastructure questions, deploy notifications

📖 Key Documents to Read in Week 1**

All available in the project workspace. Don't try to read everything Day 1 – follow the Onboarding Plan.

```
| **Document** | **Why you need it** |  
| --- | --- |  
| **Onboarding Plan v2 (this 2-week roadmap)** | Your day-by-day guide. Read  
each morning to plan the day. |  
| **Training Document v4** | Main reference – business, systems, processes. Read  
by section as Onboarding Plan directs. |  
| **Database Cheat Sheet** | From Day 2 onwards – common SQL/MongoDB queries. |  
| **Postman Setup ***** Usage Guide** | From Day 5 – how to import the QA  
Master Collection and use it. |
```

The 5 Golden Rules

Internalize these from Day 1. They'll save you a lot of stress.

```
| **#** | **Rule** | **Why** |  
| --- | --- | --- |  
| **1** | **Ask after 15 minutes of being stuck** | Wasting hours alone helps no  
one. Asking saves the team time too. |  
| **2** | **Daily Slack report – NEVER skip** | Keeps your QA Lead in the loop  
without meetings. Even a quick "stuck on X" is fine. |  
| **3** | **No question is stupid** | Every senior QA was confused at the start.  
Asking shows you care. |  
| **4** | **Confusion in Week 1 is normal** | Logistics + delivery + ops + tech  
= a lot. It clicks around Day 7-10. |  
| **5** | **Rest on weekends – burnout kills onboarding** | This is a marathon,  
not a sprint. Recharge so you can absorb. |
```

Emergency Contacts

When something blocks your work and you don't know who to ask, use this:

```
| **Issue** | **Where to go** |  
| --- | --- |  
| **QA work blocker (process, ticket question)** | DM Hue Chu (QA Lead) on Slack  
– don't wait |  
| **Day-to-day technical question** | DM your assigned Buddy first |  
| **Account / login issues (Jira, QMetry, Confluence)** | #it Slack channel or  
email it@gojitsu.com |  
| **Drata / 1Password / StrongDM access issues** | #devops Slack channel (Mo  
Kassem, Dat Tran, Hoang Do) |  
| **HR / onboarding paperwork** | ha.do@gojitsu.com (VN HR manager) or  
quynh.dinh@gojitsu.com |  
| **Personal / sensitive matters** | DM Hue Chu directly – confidential |
```

```
| **🎯 Your First Week Mantra** "Learn the landscape, not memorize the map."  
Focus on understanding how things connect, not on memorizing every term. Names,  
IDs, and enum codes will stick naturally over time as you see them in tickets  
and code. |  
| --- |
```

****You've got this. Welcome aboard!  ****
